FEATURED SPEAKERS

LYNN ATKINSON, RDH

Lynn Atkinson has been a Registered Dental Hygienist for 30 years. She graduated from Cypress College with a degree in Dental Hygiene in 1989 and was fortunate enough to be a part of several dental teams that incorporated state of the art technology. Since obtaining the Associate Fellowship Certification through the World Clinical Laser Institute (WCLI) in 1996, Lynn has been actively applying the use of dental lasers in hygiene on a daily basis. Lynn went on to achieve the Standard Proficiency Certification through the Academy of Laser Dentistry (ALD) in 2013 and the Advanced Proficiency Certification Parts I and II in 2019. Lynn is currently practicing four days a week and is also training hygienists, doctors, and team members on the use of lasers along with strategies to incorporate dental lasers into their protocol with her company, Laser Focused Hygiene. Lynn is an active member of the Academy of Laser Dentistry, the American Dental Hygiene Association, the California Dental Hygiene Association and is the Hygiene Member on the Biolase Advisory Board. Lynn serves on the Board of Directors at the Academy of Laser Dentistry as Auxiliary Chair and is involved in the testing committee. *Sponsored by Biolase.*

WILLIAM PAVELETZ, DMD

Dr. William Paveletz, DMD, is a graduate of Temple University School of Dentistry. Upon receiving his DMD degree he completed a one-year general practice residency at University of Pittsburgh and continued studying prosthetics at the Graduate Department of Pittsburgh Dental School. Currently he is VOCO's North Americas Clinical Educator. He lectures nationally/internationally to dental retailers, dental societies and teaching institutions. Dr. Paveletz has been published in various dental trade publications regarding temporization techniques with dental implants, treating geriatric patients and fluoridation usage in adolescents. He has a true passion for preventative and restorative dentistry with an emphasis on biocompatibility and holistic dentistry. His hands-on workshops focus on topics ranging from dental coding and billing, hygiene, esthetic dentistry, fixed and removable prosthetics, and Nano and ORMOCER technology. *Sponsor/Association: Voco*

TRICIA OSUNA, RDH, BSDH, FAADH

Tricia Osuna, BSDH, RDH, FAADH is a University of Southern California graduate, Past President of the American Academy of Dental Hygiene and California Dental Hygienists' Association. Tricia is in her 44th year as a dental hygienist, with many of those as a clinician. She shares her experiences with her audiences in a humorous and enlightening presentation experience. Ms. Osuna is a lifelong CDHA/ ADHA member and a previous Member of the Dental Board of California. She is a Founding Member of the American Board of Facial Esthetics. Licensed in both California and New York, her experiences traverse the dental hygiene arena in a unique way spanning a variety of roles including Consultant, Clinician, Educator, International Presenter, Author, Mentor as well as owner of Professional Insights, Inc.

PROGRAM

LECTURE: Diode Lasers Used in the Hygiene Practice

Lynn Atkinson, RDH

Course Description:

The Diode laser has become the most utilized laser in dentistry today especially in the hygiene department. Diode lasers are soft-tissue lasers that have many advantages over traditional surgical and therapeutic techniques including less pain, faster healing and precision, bacterial reduction, along with no contraindications. Some of the most commonly used Diode laser procedures in the hygiene department are Laser Bacterial Reduction (LBR), Laser Assisted Periodontal Therapy (LAPT), hemostasis, and the treatment of oral lesions (aphthous ulcers/herpetic lesions). This course will present common diode laser procedures, techniques used in the hygiene department, and how to incorporate lasers into your practice. Learning Objectives

Learning Objectives:

- Identify the laser procedures and benefits most commonly used in the hygiene department
- Understand the laser device and settings
- Discuss tips and techniques to get the best results with your patients
- Describe strategies for communicating and educating patients about lasers

HANDS-ON WORKSHOP: Diode Lasers Used in the Hygiene Practice

Lynn Atkinson, RDH

Course Description:

The Diode laser has become the most utilized laser in dentistry today especially in the hygiene department. This course will give you hands on techniques used in the hygiene practice. Mechanisms, safety, tips, and protocols will be reviewed, and attendees will have an opportunity to demonstrate the use of the lasers for Laser Bacterial Reduction, Laser Assisted Periodontal Therapy, Hemostasis, and Aphthous Ulcers/Herpetic lesions on porcine jaw.

Learning Objectives:

- Operate the laser device understanding basic biologic interactions
- Demonstrate competency in using the laser with hygiene procedures
- Understand the difference in the procedures of Laser Bacterial Reduction and Laser Assisted Periodontal Therapy
- Utilize and understand the laser safety protocols
- Understand the laser device, tips, and settings

3 Hr. Workshop
\$99

Are Your Patients Too Sensitive?

William Paveletz, DMD

Course Description:

Is it safe to say if you work in a dental office you have probably heard a patient complain about hypersensitivity at least once a day? Sensitivity brought about by hot/cold beverages or foods, sweets, or even brushing certain areas of their dentition. Sometimes the patient cannot explain what caused the sensitivity in the first place! Dentists and hygienists tend to treat with typical established procedures which deliver minimal results or they can offer state-of-the-art formulated products achieving remarkable results. This course discusses Nano/Ormocer technologies as they relate to today's preventative desensitizers, tooth creams, and fluoridation procedures used in combating patient's hypersensitive complaints and symptoms.

Learning Objectives:

- Gain an understanding of groundbreaking results that contribute to the evidence for application of varnish with chemotherapeutic fluoride treatment.
- Attendees will be educated about the method of applying Ormocer containing desensitizing treatments and Nano-hydroxy filled tooth creams.
- Understand how to discuss options with your patient how to better manage their sensitivity and pain issues that occur when they neglect their oral health.
- Understand the best approach to correctly bill for these procedures & incorporate these hygiene procedures to increase profitability in the office

No Pain, Their Gain - Ergonomics and Effective Patient Care

Tricia Osuna, RDH, BSDH, FAADH

Course Description:

This course will review ergonomics, increase awareness of repetitive motion problems and how they may be impacted by operatory design, instrument utilization / design / selection, sharpening skills / options and a variety of other issues. A clinician's ability to identify ergonomic issues is directly related to improved patient care. Detailed information will be offered on a variety of products as well as design options to best allow you to fulfill your requirements in relating to the total health of your patients. Join us for an opportunity to share, learn and critique all the above, to gather information from your peers, which you can then incorporate into your daily practice routine!

Learning Objectives:

- Design a program to enhance patient treatment while identifying ergonomic needs to provide increased quality of care
- Identify and recognize instruments available to select from for a variety of patient conditions and improved clinical outcomes
- Distinguish habits that lead to repetitive movement which may cause harm to the clinician's instrumentation abilities
- Interpret specifics for care of instruments impacting instrument longevity and accuracy of utilization
