NORTHWEST MEXICAN SOCIETY OF PERIODONTOLOGY

FRIDAY, JUNE 3, 2022
QUARTZ HOTEL • TIJUANA, MEXICO

TOTAL HOURS • 8:30 AM - 4:00 PM

THE DANCE: When Interdisciplinary Periodontal and Prosthodontic Treatments Meet to Optimize Dental Care

PRESENTERS:

Dr. Charles J. Goodacre

Dr. Thomas J. Kepic

COURSE DESCRIPTION:

A large number of interdisciplinary patient treatments will be used to demonstrate the benefits of integrating periodontics and prosthodontics, thereby permitting the restoration of esthetics for patients that desire enhanced appearance. The retention of teeth with advanced dental disease is important to many patients and this course will show treatments where such teeth were maintained rather than be extracted. Also, the guidelines and clinical procedures used to select the type of all-ceramic crown material to be used in esthetically important situations will be presented along with the design principles used to encourage incisal migration of the mucosa when restoring natural teeth and implants. Additionally, it is important to avoid complications when restoring implants and this presentation will include the design principles that enhance success through an understanding of biomechanics and surgical procedures that support these principles.

LEARNING OBJECTIVES: Following this presentation, attendees will be able to:

- Identify the benefits of integrating multiple disciplines of dentistry and the effect that has upon the quality of care.
- Describe treatment methods and clinical techniques that have been effectively used to retain teeth, improve esthetics through all-ceramic crown material selection, and encourage incisal migration of the soft tissue when restoring natural teeth and implants.
- Understand the biomechanical design principles that minimize complications when restoring single implants.

DR. CHARLES J. GOODACRE

Dr. Goodacre received his DDS degree from Loma Linda University and an MSD degree in Prosthodontics and Dental Materials from Indiana University. He served as Chair of Prosthodontics at Indiana University and Dean of the Loma Linda University School of Dentistry. He is a Diplomate and Past-President of the American Board of Prosthodontics, Past-President of the American College of Prosthodontists, and Past President of the Academy of Prosthodontics. He served as a founding member of the Foundation for Oral Rehabilitation (FOR) with oversight of the freely accessible website content (FOR.org). He has over 200 publications that include articles, abstracts, textbooks, and textbook chapters. In addition, he has developed or helped develop 17 online CE courses, 11 electronic education programs, 3 eBooks, and 5 comprehensive digital learning programs in conjunction with eHuman.com that include 3D content with VR/AR capability. He currently holds the title of Distinguished Professor and teaches in the Advanced Education Program in Implant Dentistry at Loma Linda University and maintains a private practice devoted to prosthodontics and implant dentistry.

DR. THOMAS J. KEPIC

Dr. Kepic is a Diplomate of the American Board of Periodontology and is a former Director for the American Board of Periodontology. Dr. Kepic was president for the California Society of Periodontists in 2011 and is past president of the WSP. He is a guest lecturer at several universities in the U.S. and abroad and has published in peer-reviewed journals. Dr. Kepic practices in Upland, California.

Perio-Prosthetic Synergy in Today's Dental Practice

PRESENTER:

Dr. Bobby Birdi

COURSE DESCRIPTION:

This presentation will overview the connection between prosthetic and periodontal aspects of implant therapy and how they dictate one another in today's treatment. New digital technology & implant innovations will be showcased. By understanding how thoughtful surgical and prosthetic treatment planning utilizing new innovations in both fields, we can now predictably execute predictable therapy in every case.

LEARNING OBJECTIVES:

- Understand the importance of surface technology
- Understand the advantages of sealing the implant-abutment connection
- Understand the benefits of digital planning and prosthetic planning

DR. BOBBY BIRDI

Dr. Birdi received his dental degree from the University of Saskatchewan and his post-graduate specialty training in both periodontics and prosthodontics from the University of Minnesota. He is a Fellow and previous Examiner for the Royal College of Dentists of Canada and a Diplomate of both the American Board of Periodontology and the American Board of Prosthodontics. Dr. Birdi is one of the very few board-certified dual specialists in periodontics and prosthodontics in North America, and the first and only specialist in the world to attain board certification in these two specialties in both the USA and Canada. Dr. Birdi is the co-founder of the Digital Dentistry Institute which is a global learning organization for his fellow dentists, and one of the largest dental educational organizations in North America. He is also founder of the BC Perio Dental Health & Implant Centres in Vancouver which is one of the largest and most technologically advanced multi-specialty dental centers in Canada.

Sponsored by Nobel BioCare.

SCHEDULE

8:00-8:30	Registration
8:30 - 10:30	Lecture - Dr. Goodacre
10:30 - 10:45	Coffee Break
10:45 - 12:30	Lecture - Dr. Kepic
12:30 - 2:00	Lunch and Exhibits
2:00 - 4:30	Lecture - Dr. Birdi

Course Fees

Dentists members	\$120.00
Dentists non members	\$150.00
Students	\$90.00
