ADA CERP® | Continuing Education
 Recognition Program

The Western Society of Periodontology is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. WSP designates this activity for six hours (6) continuing education credits.

FEATURED SPEAKERS

DR. LEE SHELDON, DMD

Dr. Lee Sheldon, a seasoned periodontist with over four decades of clinical excellence, combines his deep expertise in periodontal treatment, implant dentistry, and overall treatment planning with a fervent commitment to professional education and practice enhancement. As a co-director of the Institute for Dental Specialists and an accomplished author and speaker, Dr. Sheldon is dedicated to revitalizing the periodontal landscape. His mission is to empower dental professionals across the United States and Canada by improving their abilities to save teeth and create a periodontal management program that works for both the patient and the practice. He also delivers innovative training and proven strategies that enhance both patient care and practice management. His approach integrates comprehensive, gradient-based practice improvements, positioning dental practices as premier providers of predictable periodontal and full dental care. Dr. Sheldon's leadership extends to developing key resources and tools, ensuring that every dentist can excel as a pivotal figure in dental health.

PROGRAM

Dr. Lee Sheldon, DMD

Non-Surgical Treatment of Chronic Periodontitis Made Predictable

Course Description:

Advancements in diagnostics and treatment tools are making non-surgical periodontitis treatment a reality. Despite leading a major dental implant surgical practice, Dr. Lee Sheldon has been successfully treating periodontitis non-surgically—primarily through his hygienists—since 2000. In this presentation, Dr. Sheldon will walk you through his diagnostic and treatment approach, demonstrating how many teeth can be saved without surgery. He will also introduce a simple, research-backed chart developed by experienced periodontists to help clinicians effectively communicate patient assessments and treatment plans.

Learning Objectives:

- Gain a clear, practical model for non-surgical periodontitis treatment that you can implement in your practice.
- Understand the role of diagnostics in patient education and treatment planning.
- Learn a straightforward system of outcome guidelines aligned with the 2018 Classification of Periodontal and Peri-Implant Diseases and Conditions. *Sponsored by: PerioView*

Nancy Miller, RDH

POWER OFF BIOFILM!

Course Description:

Staying current with clinical applications of power instruments has a new level of importance in this era of technology and the Oral Systemic Link research. Understanding how to get the most out of power scalers and air polishers leads to more time efficiency, better treatment results, and better ergonomics for the hygienist.

While air polishers have been around for 4 decades, their use was generally restricted to supragingival stain removal. Like ultrasonics with micro tips, their use with finer size powder particles has evolved into the next treatment modality for preventative and periodontal therapy. What do you need to know about this latest technological application? How can you incorporate it into your clinical routine? How can they be used around implants? We now have Perio Classifications for Implants and how can we use Power Air Streaming in practice?

While micro ultrasonics are now considered standard of care in periodontal therapy, what else are you using them for? What technological advances have there been since you were in school or your last CE Course? Is there really a difference between piezoelectric technology and magnetostrictive units? Are there any new inserts on the market? Is there any superior way to adapt ultrasonic instruments to the type of patient in your chair?

Learning Objectives:

- Participants will learn
 - Biofilms role in inflammatory disease
 - Air polishing subgingivally using glycine perio powders
 - Implant maintenance and peri-mucositis treatment following AAP codes
 - Contrasts in piezoelectric/magnetostrictive technologies
 - Latest information on generators and inserts
 - Patient case studies on power instrument protocols
 - Ergonomics and Aerosol control hints
- Sponsored by: HuFriedy*

Tiffany Wuebben, RDH

Hygiene Mastery: Soaring to Success with the Power of Hygiene

Course Description:

Dental providers are often unsure how to leverage the hygiene department and grow the business. There's never been a better time to revolutionize this approach! Tiffany Wuebben, RDH shares systematic methods that combat today's dental practice challenges, support patient health, and significantly improve career satisfaction and the financial success of the practice. In this course, we will engage in a collaborative approach to developing the mission/vision and patient care protocols for the hygiene-driven practice. We'll also discuss a method to revolutionize your hygiene schedule with a 100% reappointment rate. Next, we'll explore the steps to increase capacity through patient advocacy, recall, reactivation, reviews and better patient-practice relationships. We will also help you to recognize adjunct procedures that boost patient care and identify empowering practice strategies that transform the hygienist into a true "Hygienepreneur." Finally, we'll highlight the proactive steps that professionals can take to build a thriving "hygiene practice within a practice" and develop the knowledge and skills to build a strong hygiene department leading to better clinical outcomes, greater case acceptance, all while maximizing the practice potential.

Learning Objectives:

- Determine the strategies to build a thriving "hygiene practice within a practice"
- Realize how the hygiene department serves as the "secret sauce" for a successful practice by leveraging skills of effective communication and improving the connection with your patients
- Interpret the impact of knowing your numbers to drive exceptional patient care, building a strong foundation for your practice
- Discover the "super" provider in you and how you can offer a hygiene-mix of services that optimizes better patient outcomes and increases practice revenue *Sponsored by CareCredit & Mango Voice*
