SPEAKERS

Giles B. Horrocks, DDS, MS
Immediate Implant Placement in the Deficient Ridge of the Esthetic Zone. Controlled Ridge Expansion with 5 and 10 year follow up.

Course Description:

This is a non invasive biological procedure that can decrease treatment time, cost and complications. The limitations and contraindications are reviewed. The procedure requires piezo electric surgery and tapered implant designs with future concepts using wedge shaped implant designs.

Biography:

Dr. Horrocks is the president of the Western Society of Periodontology and past president of the Rocky Mountain Society of Periodontology. He was instrumental in bringing Piezo-surgery to the US and has published on the benefits of using precision bone surgery in manipulating alveolar bone to increase bone volume for dental implant placement. He has lectured to both Oral Surgery and Periodontal Societies on soft tissue issues relative to dental implants. He currently maintains a multi-disciplinary practice with three periodontists and two prosthodontists.

Harjit Singh Sehgal, BDS, MS, FAGE
Regenerative Therapy for Peri-implantitis: Hope or Hype?

Course Description:

Peri-implant diseases are highly prevalent, with peri-implantitis often presenting as a complex and challenging clinical condition. Regenerative therapies offer promising potential for achieving optimal outcomes, but their effectiveness and predictability remain subjects of ongoing debate. This course critically evaluates the efficacy, challenges, and future directions of regenerative approaches, providing an in-depth look at both their potential benefits and limitations in clinical practice. Participants will explore the latest research, clinical outcomes, and case studies, equipping them with the knowledge to make informed decisions about incorporating regenerative therapies into their treatment plans for peri-implantitis. By the end of the course, attendees will have a balanced perspective on whether regenerative therapy is a viable treatment option or if it remains more hype than reality in the context of peri-implantitis management.

Learning Objectives:

By the end of this course, participants will be able to:

- Understand the pathophysiology of peri-implantitis
- Evaluate current regenerative therapies used to treat peri-implantitis
- Assess the efficacy of regenerative approaches
- Identify the benefits and limitations of regenerative therapy
- Anticipate future developments in regenerative therapy for peri-implantitis

Biography:

Dr. Sehgal is the Immediate Past President of the Western Society of Periodontology. He is also an Associate Professor and Associate Director of Predoctoral Periodontics at Oregon Health & Science University (OHSU) School of Dentistry in Portland, Oregon. A Diplomate of the American Board of Periodontology, Dr. Sehgal serves as a Board Examiner as well. He directs numerous periodontology courses and teaches both pre-doctoral and post-doctoral students. With over 20 years of clinical and research experience, Dr. Sehgal's current research focuses on clinical investigations related to CBCT accuracy, electronic health records, dental quality measures, and opioid prescribing behaviors. Dr. Sehgal serves as a reviewer for several prestigious scientific journals, including the Journal of Periodontology, Clinical Advances in Periodontics, Special Care in Dentistry, Journal of Dental Education, and Journal of Advanced Oral Research. He maintains a cutting-edge dental practice limited to periodontics and implant dentistry within the OHSU Faculty Dental Practice. In addition, Dr. Sehgal lectures both nationally and internationally on periodontics, implant dentistry, substance use disorders, and trauma-informed care. Dr. Sehgal has been recognized with numerous awards, including the 2015 Educator Award from the American Academy of Periodontology and the 2022 Educator Award from the Western Society of Periodontology.

Ali Sajadi DDS, MSD
Advancing Diagnosis, Treatment and ROI : The Role of Dental Endoscopy in Periodontal Therapy

Course Description:

The role of advanced field view in dentistry is changing the qualitative approach we have to care. Paramount to this direction in the field of dentistry is the use of a Dental Endoscope in the role of diagnostic evaluation, periodontal therapy and peri-implant therapy. We will discuss the benefits of utilizing this technology and how it can benefit your results and financial health of your practice.

Learning Objectives:

- Understand the utility of Dental Endoscopy in diagnosis
- Understand the benefits of assisted field view periodontal therapy
- How this modality can accelerate the quality of your diagnosis and become a part of your productive technology armamentarium

Biography:

Dr. Ali Sajadi, a native of Houston, TX, is a board-certified Periodontist, Oral and Implant Surgeon specializing in a wide range of periodontal care, oral surgery and facial esthetics. Having received his undergraduate education at Washington University in St. Louis with a Bachelor of Arts Degree in Biology and in Economics, he was a noted member of the Forsyth Institute's Human Genome Project Initiative. After completing two years of biomedical research, Dr. Sajadi embarked on a professional career in medical management that led him to attain his Master of Arts in Medical Sciences Degree from Loyola University of Chicago. Upon graduation, he took on a position as Senior Network Account Manager with UnitedHealthcare, and for 3 years rose through the ranks to become one of the most successful negotiators within the company. Following his passion to help people, Dr. Sajadi completed a 4 year doctorate degree at Indiana University School of dentistry in 2012 and moved back to Houston to complete his residency in Periodontics and Dental Hygiene. There, Dr. Sajadi continued to improve on his skill set by being proficient in all implant and dental surgical modalities with a passion for the rehabilitation and regeneration of periodontal and osseous tissues. Beyond and within the scope of Periodontics and Dentistry, Dr. Sajadi is a published author in the literature and noted speaker for several companies. He is an active member of the American Academy of Periodontics, Texas Society of Periodontists, Greater Houston Dental Society, Greater Houston Periodontal Society, American Dental Association and the Southwest Society for Periodontists. In many of these organizations, Dr. Sajadi has served as various leadership positions and his professional training and background makes him highly qualified to treat extensive and complex surgical cases. In his free time, Dr. Sajadi loves to cycle, hunt, fish, cook and read. He serves as the founding member and president of the UTH Periodontics Alumni Association and currently serves as the president of the Greater Houston Society of Periodontists.

Bobby Birdi, DB.Sc, DMD, MSc, Dip. Perio, Dip. Pros., FRCD(C), FACP, DABP
Surgical-Prosthetic Update: Materials, Digital Workflow, Digital Surgery and More!

Course Description:

This presentation will discuss various new innovations in prosthetic and surgical genres with a focus on digital technology and workflow. The practicality of materials, digital technology, restorative design and new innovations will be discussed.

Biography:

Dr. Birdi received his dental degree from the University of Saskatchewan and his post-graduate specialty training in both periodontics and prosthodontics from the University of Minnesota. He is a Fellow and Examiner for the Royal College of Dentists of Canada and a Diplomate of both the American Board of Periodontology and the American Board of Prosthodontics. Dr. Birdi has academic affiliations at the University of British Columbia and the University of Minnesota, where he is involved in research projects and clinical trials. Dr. Birdi also lectures internationally on perio-prosthetic implant therapy. Dr. Birdi is the co-founder of the Digital Dentistry Institute and is currently practicing at the BC Perio Dental Health & Implant Centres in Vancouver.

SPEAKERS

Susan S. Wingrove BS, RDH
Mastering the Arch! Full Arch Implant Maintenance and Home-Care

Course Description:

Support your patients choosing to replace dentures or edentulous arches with implant-supported full arch fixed or removable prostheses. Assessment of patient's tissues, abutments, and implants are the critical component in the success of implant-supported Full Arch prosthesis patients. In this course, participants will gain an understanding on how to provide assessment, maintenance, and home-care recommendations for the 'full arch fixed and removable prosthesis patient'. Experience step-by-step videos on removal and replacement of the fixed full arch prosthesis based on Susan's textbook: Peri-implant Therapy for the Dental Hygienist: 2nd Edition. Comprehend the WHAT, WHY, and HOW To Master the ARCH!

Learning Objectives:

- Understand the current research on implant maintenance and home-care specifics to protect the implant surface and peri-implantitis prevention.
- Experience through live patient videos HOW TO remove and replace full arch prostheses and the flow of a professional implant maintenance visit.
- Be able to provide the tools and products for critical home-care recommendation and disease prevention.

Biography:

Susan Wingrove BS, RDH. International speaker, researcher, and writer. Dental hygienist RDH Award of Distinction and Western Society of Periodontology Hygiene Educator of the year recipient. Instrument co-designer of the Wingrove Titanium Implant Scalers, ACE probes, and Queen of Hearts instruments for PDT. Consultant and contributor to multiple research studies, product developments, and on the Oral-B Global Implant and Western Society of Periodontology Boards. Susan specializes in providing protocols that follow the science for healthy teeth, implants, and disease treatment. Published author; American and International journals on peri-implant therapy, regeneration, advanced instrumentation, customizing patient home-care, and textbook: Peri-Implant Therapy for the Dental Hygienist: 2nd Edition. Resides in Missoula, Montana to enjoy fly fishing, hiking, and snowshoeing.

Deb Goldman, RDH
Domestic Violence for Dental Professionals

Course Description:

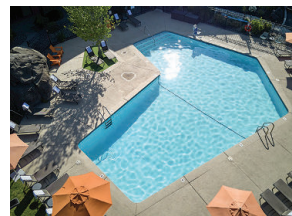

This course aims to enhance the understanding and recognition of domestic violence in healthcare settings, with a focus on identifying signs, understanding legal responsibilities, and providing comprehensive support to victims.

Learning Objectives:

- Recognize various forms of domestic violence, including physical, emotional, sexual, economic, and psychological abuse.
- Identify risk factors and symptoms in patients, with particular attention to vulnerable populations.
- Understand legal obligations for mandatory reporting, including Florida-specific legislation.

Biography:

Deb has been an RDH for over 45 years, she graduated from Santa Fe College in Gainesville, FL. She worked in private practice in the Tampa area for many years and represented Viadent and Colgate at dental meetings throughout the country. She has worked in Dentistry with her husband Todd since 1992, growing the meeting management, membership, and revenues of several organizations. She has owned a Jazzercise Premier Center for over 40 years. She has four grown children and loves to travel.

Riverhouse Lodge is a destination within a destination - you are at the heart of endless opportunities to venture and explore the beautiful area that is Bend, Oregon and beyond. We are in tune with the adventurous side of our guests, and it is our mission to provide any experience they might desire. We create an atmosphere that fuels memories for a lifetime.

Riverhouse Lodge is a destination for comfort and connection; it sets the tone for guests to create new beginnings, reignite old desires, and make long-lasting memories. Escape the busyness and immerse in the solitude of the woods, the therapeutic rhythm of the river, and the serene atmosphere that is Riverhouse Lodge.

ADA C.E.R.P.[®] | Continuing Education
Recognition Program

The Western Society of Periodontology is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. WSP designates this activity for up to 20 continuing education credits.
