ADA CERP® | Continuing Education
 Recognition Program

The Western Society of Periodontology is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. WSP designates this activity for six (6) hours continuing education credits.

FEATURED SPEAKERS

NANCY J. MILLER RDH, BA

Nancy Miller owns ultraconcepts specializing in power instrumentation instruction, is a Key Opinion Leader and product evaluator for Hu-Friedy Group since 1995, a clinical advisor for Jameson Group since 1998, and is a panelist on the Cellerant Group for Best of Class Hygiene Awards debuting in 2021. She is a hygiene clinician and life enthusiast in Green Bay, Wisconsin, where she resides and plays nicely with others. *Sponsored by: Hu-Friedy*

LYNN ATKINSON, RDH

Lynn Atkinson, RDH, is a Registered Dental Hygienist with 35 years of experience. She graduated from Cypress College, CA with a degree in Dental Hygiene. Since obtaining her Associate Fellowship Certification through the World Clinical Laser Institute in 1996 she has achieved Standard Proficiency Certification through the Academy of Laser Dentistry in 2013 and Advanced Proficiency Certification Parts I and II in 2019. Practicing clinically three days a week, Lynn has experience with diode, Nd:YAG, Erbium, and CO2 lasers. She lectures and provides hands-on training to dental professionals on incorporating lasers and other adjunctive therapies into their protocols. Over the past several years, Lynn has spoken at numerous conferences nationwide, authored several published articles, and been a guest speaker on industry audio media platforms. An active member of multiple dental associations, Lynn is a key opinion leader for several dental manufacturers and companies, as well as a speaker and SDA trainer for US EMS Guided Biofilm Therapy. She serves on the Board of Directors at the Academy of Laser Dentistry as Auxiliary Chair and is a member of the ALD Speakers Bureau, Education, Conference, and Testing Committees. Lynn is an Academy of Laser Dentistry standard level course provider and the honored recipient of the ALD 2022 Leon Goldman Clinical Excellence Award and the Western Society of Periodontology 2024 Hygiene Speaker of the Year Award.

TIFFANY WUEBBEN, RDH

Tiffany Wuebben, RDH, is the author of Hygienepreneur: The Dental Hygienist's Guide to Achieving Career Success & Personal Transformation, a comprehensive guide on harnessing the power of the hygiene department in building a thriving practice. She is also the founder and CEO of The Hygienepreneur, a consulting company dedicated to transforming hygiene departments into high-performing, profitable assets through innovative training and dynamic workshops. *Sponsored by: Care Credit*

PROGRAM

Nancy Miller, RDH
POWER OFF BIOFILM!

Course Description:
Staying current with clinical applications of power instruments has a new level of importance in this era of technology and the Oral Systemic Link research. Understanding how to get the most out of power scalers and air polishers leads to more time efficiency, better treatment results, and better ergonomics for the hygienist.
While air polishers have been around for 4 decades, their use was generally restricted to supragingival stain removal. Like ultrasonics with micro tips, their use with finer size powder particles has evolved into the next treatment modality for preventative and periodontal therapy. What do you need to know about this latest technological application? How can you incorporate it into your clinical routine? How can they be used around implants? We now have Perio Classifications for Implants and how can we use Power Air Streaming in practice?
While micro ultrasonics are now considered standard of care in periodontal therapy, what else are you using them for? What technological advances have there been since you were in school or your last CE Course? Is there really a difference between piezoelectric technology and magnetostrictive units? Are there any new inserts on the market? Is there any superior way to adapt ultrasonic instruments to the type of patient in your chair?

- Learning Objectives:**
- Biofilms role in inflammatory disease
 - Air polishing subgingivally using glycine perio powders
 - Implant maintenance and peri-mucositis treatment following AAP codes
 - Contrasts in piezoelectric/magnetostrictive technologies
 - Latest information on generators and inserts
 - Patient case studies on power instrument protocols
 - Ergonomics and Aerosol control hints

Lynn Atkinson, RDH
Comprehensive Care and Planning for the Dental Hygienist

Course Description:
The dental hygienist is a key collaborator in comprehensive diagnosis and treatment planning alongside the dentist. But how can hygienists efficiently gather clinical data, educate patients, and deliver treatment recommendations that lead to better outcomes? This course explores the integration of technology, diagnostic tools, and communication strategies to elevate the patient experience and enhance practice value. Topics include Guided Biofilm Therapy, laser-assisted care, and voice-activated charting—all designed to streamline workflows while delivering high-quality, patient-centered care.
Learning Objectives:
By the end of this course, participants will be able to:
• Outline the components of an ideal comprehensive care appointment
• Effectively communicate clinical findings and educate patients to encourage treatment acceptance
• Select and apply technologies and protocols that enhance diagnostic efficiency and therapeutic outcomes

Tiffany Wuebben, RDH
Hygiene Mastery: Soaring to Success with the Power of Hygiene

Course Description:
Dental providers are often unsure how to leverage the hygiene department and grow the business. There's never been a better time to revolutionize this approach! Tiffany Wuebben, RDH shares systematic methods that combat today's dental practice challenges, support patient health, and significantly improve career satisfaction and the financial success of the practice. In this course, we will engage in a collaborative approach to developing the mission/vision and patient care protocols for the hygiene-driven practice. We'll also discuss a method to revolutionize your hygiene schedule with a 100% reappointment rate. Next, we'll explore the steps to increase capacity through patient advocacy, recall, reactivation, reviews and better patient-practice relationships. We will also help you to recognize adjunct procedures that boost patient care and identify empowering practice strategies that transform the hygienist into a true "Hygienepreneur." Finally, we'll highlight the proactive steps that professionals can take to build a thriving "hygiene practice within a practice" and develop the knowledge and skills to build a strong hygiene department leading to better clinical outcomes, greater case acceptance, all while maximizing the practice potential.
Learning Objectives:
• Determine the strategies to build a thriving "hygiene practice within a practice"
• Realize how the hygiene department serves as the "secret sauce" for a successful practice by leveraging skills of effective communication and improving the connection with your patients
• Interpret the impact of knowing your numbers to drive exceptional patient care, building a strong foundation for your practice
• Discover the "super" provider in you and how you can offer a hygiene-mix of services that optimizes better patient outcomes and increases practice revenue
