ADA CERP® | Continuing Education
Recognition Program

The Western Society of Periodontology is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

WSP designates this activity for six (6) hours continuing education credits.

FEATURED SPEAKERS

GILES B. HORROCKS, DDS, MS

Dr. Horrocks is the past president of the Western Society of Periodontology and of the Rocky Mountain Society of Periodontology. He was instrumental in bringing Piezosurgery to the US and has published on the benefits of using precision bone surgery in manipulating alveolar bone to increase bone volume for dental implant placement. He has lectured to both Oral Surgery and Periodontal Societies on soft tissue issues relative to dental implants. He is Board certified as a Diplomate of the American Board of Periodontology and internationally recognized as an author, key opinion leader, educator, and sought-after clinician in his field. He currently practices Rocky Mountain Dental Specialists in Longmont, Colorado.

TIFFANY WUEBBEN, RDH

Tiffany Wuebben, RDH, Founder and CEO of The Hygienepreneur™, is an internationally recognized speaker, consultant, and author with over 30 years in dentistry. Combining two decades of clinical experience with her expertise in leadership, communication, and practice growth, Tiffany helps dental practices elevate care, culture, and profitability. She is the author of Hygienepreneur: The Dental Hygienist's Guide to Achieving Career Success & Personal Transformation and co-author of Culture Catalyst. Tiffany's passion is helping dentists and their teams strengthen collaboration, elevate communication, and build thriving, patient-centered practices that enhance care, culture, and profitability. *Sponsor: CareCredit*

HEATHER ROGERS, RDH

Heather Rogers began her career in dental hygiene in 1999 when she graduated from the College of Southern Nevada. She has worked in prosthodontics, periodontics, and general dentistry. Heather discovered her love for presenting educational courses while achieving her bachelor's degree and being involved with her professional association. She completed her Bachelor of Science in Dental Hygiene in 2010 and is currently providing continuing education for professionals in communications, diabetes, COPD, vaping, implant maintenance, probiotics, instrumentation, metabolic syndrome, marijuana, and infection control.

PROGRAM

Giles B. Horrocks, D.D.S., M.S.
IT IS NOT ALWAYS JUST BIOFILM! What are the Biologic Complications Leading to Implant Bone Loss.

Program Description:
Why does bone loss occur around dental implants. Reviewing how emergence profile, implant position and abutment shape contributes to bone loss can help you diagnose, treat and predict outcomes. This is good information for you and your patients. Knowledge brings confidence.

Learning Objectives:
You will learn.

- What your treatment focus should be during recare appointments.
- How much time between recare appointments.
- What systemic conditions can play a role in bone stability.
- What medications can play a role in bone stability.
- What is the Biologic Width and how does that impact the bone levels around dental implants.
- How does the gum thickness play a role in bone stability.

Tiffany Wuebben, RDH
Health Harmony 2.0: Unleashing Your Super-Provider Power Through AI-Driven Prevention (Code: 250)

Course Description:
Step into your super-provider era with a dynamic, prevention-first approach powered by artificial intelligence. This clinically focused course transforms oral-systemic science into action, showing hygienists and dental teams how to harness AI-assisted diagnostics, imaging, and analytics to detect risk earlier, personalize prevention, and enhance patient outcomes. Participants will explore how technology streamlines documentation, calibrates perio and caries protocols, and connects medical and dental care through data-driven communication. Attendees leave equipped to lead their practices with clinical precision, interprofessional collaboration, and the confidence that the numbers truly equate to care.

Learning Objectives:
At the conclusion of this course, participants will be able to: 1.

- Describe how AI-enhanced diagnostic tools identify oral-systemic risk factors in caries, periodontal disease, airway health, and metabolic indicators.
- Demonstrate methods for integrating digital imaging, analytics, and data platforms to improve diagnostic precision and calibration across the hygiene department.
- Develop prevention-driven clinical protocols that elevate hygiene to a leadership role in whole-body health and prove that the numbers equate to care.
- Implement adjunctive therapies and interprofessional communication strategies that personalize prevention, optimize outcomes, and expand each clinician's super-provider potential.

Heather Rogers, RDH
Providing Care in a Marijuana Legal World

Course Description:
Have you thought about how medical and recreational marijuana use may impact you as a practitioner? This course will discuss your possible liabilities in the treatment of patients using this drug. With states legalizing marijuana, it will be challenging to address just how to safely provide dentistry to our patients. We'll discuss how to make common sense decisions on a topic that may prove to be very challenging in the future. We will also discuss the basic history, method of use, myths, and provide a general knowledge of this complex and ever-changing topic.

Learning Objectives:

- This class will provide some of the history of marijuana
- This course will describe marijuana and how it is used
- The class will define physical implications of medical and recreational marijuana use
- This class will list the effects of marijuana use on the dentition and oral tissue
- The course will discuss contraindications in providing dentistry to patients using marijuana in a medical or recreational manner
